RESORT CLUB MANAGEMENT AND CONSULTING

The BlueStar team understands the important balance created by consistently-delivered community amenities, from spa to restaurant to fitness to lodging and more. It's not an added service we thought about later – it is part and parcel with who we are. Our group has decades of hospitality experience at the highest levels, and we leverage that expertise to ensure that all aspects of a community or resort work together.

Our club and resort management teams put into practice our guiding principle: great amenities demand effective leadership, innovative thinking, superb design, flawless maintenance, exciting customer-focused programs, and activities and service that exceed member and guest expectations.

Who's a fit for our services?

Communities or developments offering numerous amenities as part of an overall ownership experience.

Development groups looking to leverage lifestyle as a key selling proposition in a real estate venture.

Spas, restaurants and fitness centers in hotels or resorts where on-site leaders would prefer to outsource these often high-maintenance ancillary businesses.

We say we're great, but what do others think? Our largest client, Trilogy® by Shea Homes®, was recently awarded its fourth consecutive JD Power & Associates award for “Highest satisfaction among buyers in Active Adult Communities.” A significant contributor to this satisfaction is the quality of the community experience for which BlueStar is responsible.

GOLF COURSE MANAGEMENT AND CONSULTING

Our experience working with more than 100 golf courses has enabled us to develop a track record of success. From operations to marketing & sales to food & beverage to human resources to agronomy and beyond, the BlueStar team is fully capable of creating an experience that is consistent and compelling – and financially successful.

While numerous agreement structures exist including à la carte options tailored to suit a client's needs, BlueStar's encompassing golf management retainer includes all things necessary to manage the business, and allows golf course owners to focus on issues more important in their bigger picture.

Words are nice, but results are what matter. Here are just a couple great examples:

Trilogy Golf Club at Vistancia earned Golf Digest's coveted Five-Star status and has produced year-over-year revenue growth every year since it first opened in 2004, even in the most challenging economic times.

Ironwood and Oakwood Country Clubs - located within the IronOaks community of Sun Lakes in Chandler, Arizona - are experiencing record financial performance under BlueStar's management. By helping to recruit critical positions like golf course superintendent, players are enjoying a better golf experience while the financials continue to improve.

DEVELOPMENT MANAGEMENT

The path for a successful operation does not begin opening day. It takes months, sometimes years, of careful planning, forecasting – and more often than not – dreaming. Early decisions – on golf course and clubhouse design, construction partners, financial controls, pre-opening marketing, hiring and training – all have tremendous impact on the long-term success of a project, not to mention the potential impact on the residual sales price.

By engaging BlueStar early in the development process, our clients benefit from the best practices we’ve learned over decades in the industry. Projects we’ve worked with have received many industry accolades from the very first day of operation, and garnered handsome returns upon disposition.

Design with purpose. If there is a “secret sauce” that BlueStar brings to amenity development, it is the in-depth knowledge of how design impacts future workflow. Years of time-in-motion analysis – combined with decades of on-the-floor knowhow – allow the BlueStar team to work with the architects and interior designers to create environments that both look beautiful and work functionally.

RESTAURANT MANAGEMENT

BlueStar can evaluate your existing operation – or help develop one from the ground up – with in-depth analysis of all details including infrastructure, design, menu development and purchasing. We analyze and engineer all menus to create better cross-utilization of products, more efficient use of food storage, less waste and better margin. We are constantly seeking out and implementing the latest in food styles and trends for our clubs.

While we have comprehensive purchasing solutions and national programs we also provide a comprehensive network of valued local vendors. These strong national and regional buying programs can typically provide immediate savings, along with more exacting product specifications which improve overall quality.

When Shea Homes decided to incorporate more than 1,000 new homesites into its Trilogy at Vistancia community, it knew that updates needed to be made to the existing restaurant concept. Thus the older Verde Grill was re-imagined as V's Taproom, and since the completion of the remodel in late 2013 revenues are up more than 100% and F&B profits recently surpassed golf profits for the first time.

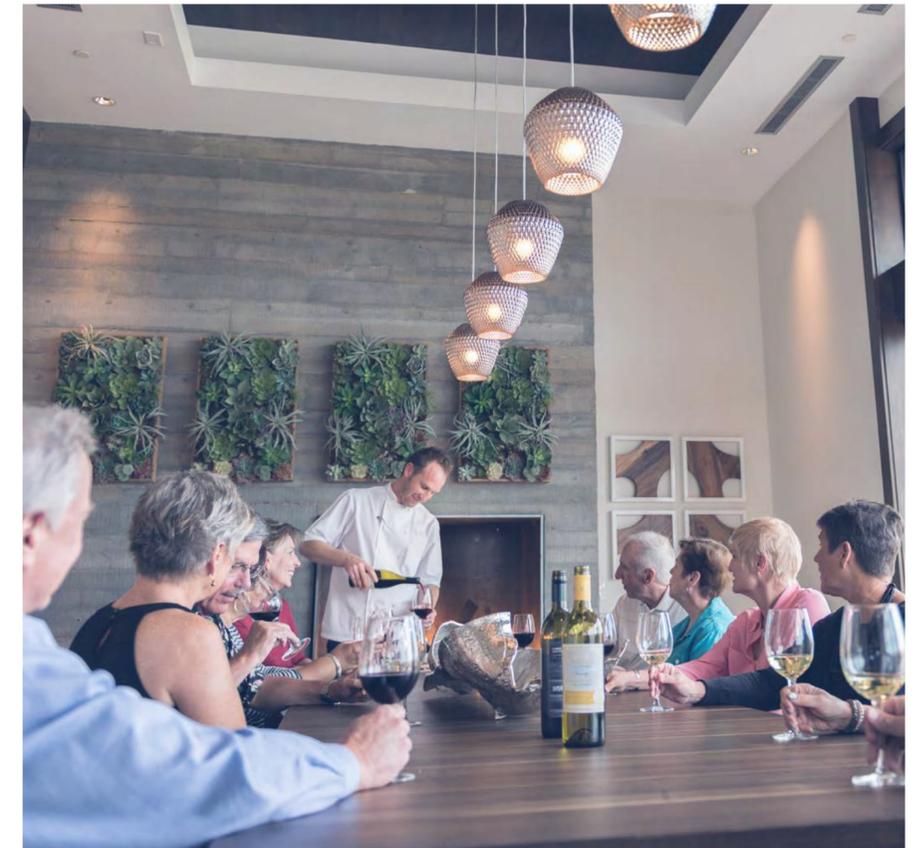

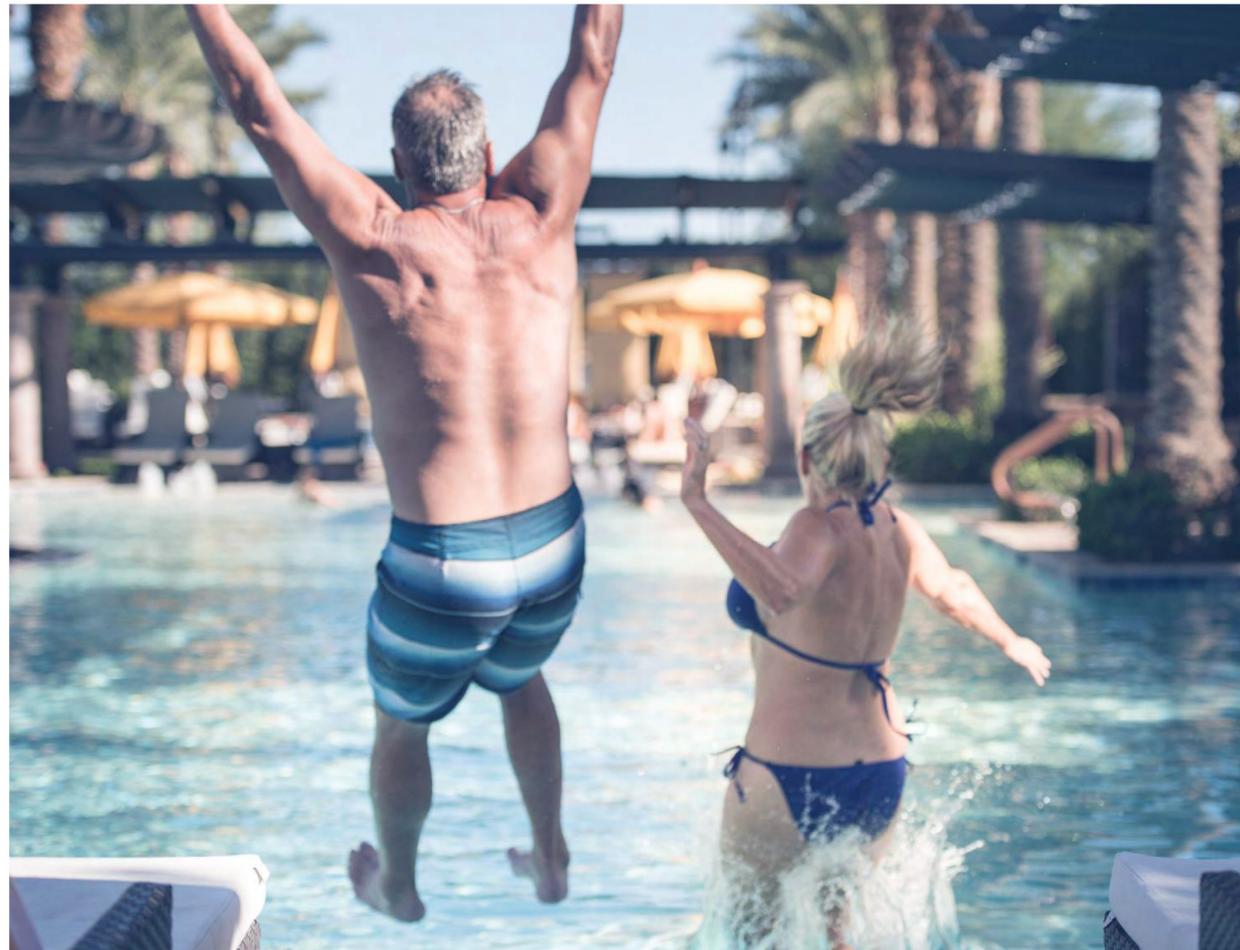

SPA MANAGEMENT

There may be no business less relaxing for its operator than the spa business. We take on the high stress so our customers and clients can decompress.

The BlueStar team is experienced in all areas of spa operations, including salon services, fitness, wellness, retail, lifestyle and activities. With backgrounds that include some of the world's best known brands – Westin, Ritz Carlton, and Hyatt among them – our leaders understand what guests of 5-Star and 5-Diamond properties require.

BlueStar helps to craft a unified vision and then implements service standards and marketing systems so the management team can focus on creating increased usage, outstanding customer service, relaxing spa experiences, and ultimately stronger financial results.

Feel like a million dollars. BlueStar manages resort community spas throughout the country, the most successful of which is the Sawa Spa at Trilogy at the Vineyards in Brentwood, California. Thanks to the hard work of the team on-site, that spa surpassed a million dollars in revenue in 2016, a number thought impossible when the club first opened.

LIFESTYLE AND ACTIVATION

BlueStar is the foremost expert in the Boomer-targeted, amenitized community space. Through years of being Shea Homes' partner at Trilogy, we have learned how to create an environments where people can have fun and get more joy out of their lives. That's a win for residents, and also a win for the developers or HOA's who are our clients, as happier owners lead to increased values and hastened sales pace.

In 2017, we introduced an all-new proprietary content management system, which allows us to launch high-quality websites which showcase the distinct experiences we have under management. We also have a full-time, Scottsdale-based National Lifestyle Director who, along with her team, help create the magic in our communities.

We also tightly measure our success in this area via semi-annual Member surveys. How do we do? Pretty well, actually. In fact, in 2017, 90% of our residents said they were happier in life than when they moved in.

BARREL MASTERS

Innovative programming. In 2018, BlueStar helped Trilogy launch its nationwide wine program, Barrel Masters. Benefits include preferred pricing on special orders, on-site wine storage, and more. Plus, a lot of sizzle for those considering moving into the communities.

LODGING MANAGEMENT

We always want to be responsive to our clients' needs, so when a partner asked us to pull from our team's extensive hotel background and put together a vacation rental program for one of their communities and clubs, we jumped at the opportunity. What started as four developer-owned condos in the mountains turned into multiple locations and more than 30 homes under management. Moving forward, we'll be working with clients to integrate hotel rooms into their clubhouse experiences, setting up great opportunities for staff utilization and real estate sales.

A Story of Success: Schaffer's Mill Vacations.

In 2015, BlueStar stepped in to assist our partners at Schaffer's Mill Golf & Lake Club in Truckee, California in creating their own vacation rental management company. With support from a local broker, the business was created, and since that time has grown to more than \$1M in annual revenue functionally.

ASSOCIATION MANAGEMENT

In communities where we already have a presence, we have in some circumstances, expanded our offering to provide traditional HOA Management services. We've done this either internal resources or strategic partnerships, depending on what made sense for the client.

While this is not something we actively pursue, it is a service we have been offering more and more as our company evolves. Regardless of whether we are doing the actual HOA management, we have many clients for other services which are HOAs.

WHY SHOULD YOU CHOOSE BLUESTAR?

Not to blow our own horn, but we are able to offer a complete solution for the lifestyle-management needs of our clients, from delivering a great golf, restaurant, spa and community club experience to residents; to designing, installing, and maintaining landscape environments; to implementing programs that convert day guests to lifelong residents. It's what we do better than anyone else. Oh, and by the way, we do it for less than you'd probably think.
